

## PAT Tester Calibration Form

For more information, visit our website [pat-testing.equipment](http://pat-testing.equipment) or call us 01482 827600

### Calibration Service

PAT Testers are important instruments and it is essential that they continue to perform correctly and accurately. If a PAT Tester is faulty, or is reading inaccurately, there is a possibility it could fail to detect a fault on an appliance.

It is normally recommended that PAT Testers are given a calibration check at least once every 12 months, and this may in fact be a requirement of quality control systems such as ISO 9000/9001

To arrange a calibration check for your PAT Tester, please check the price bands below, complete the form overleaf and return it to us. Scan and email to [calibration@yotari.co.uk](mailto:calibration@yotari.co.uk) or phone us on **01482 827600**. We'll take care of the rest!

Price Band A (£65.00 + VAT)	Price Band B (£55.00 + VAT)	Price Band C (£58.00 + VAT)

### Repairs

We can usually organise repairs to most PAT Testers - please contact us by phone for advice. If we discover that your PAT Tester is faulty, then we will contact you for authorisation before proceeding with chargeable repairs. Some PAT Testers, such as the BattPAT are covered by a lifetime warranty and so will be repaired free of charge.

### Collection and Delivery

We are able to organise collection from your premises using our courier, and of course can deliver back to you once the calibration is complete. If you prefer you can send your PAT Tester directly to us, or if you are close to our office in Hull you can drop it off and save on courier charges! Normally, we would expect to have your tester back to you within five working days of receipt, but please let us know if you require an urgent service, or delivery back to you on a specific date. If you request a collection, we will organise this with our courier and advise you of the details - please make sure the PAT Tester is available for collection at the agreed time and date.

**Please ensure all accessories, leads and adaptors are returned with your PAT Tester - especially the earth lead that you normally use. This is very important! Also, make sure the PAT Tester is packed into a strong cardboard box (not copy-paper box!) to avoid any possibility of damage in transit. We use a reputable courier service and all packages are insured up to £1000 value.**

To Proceed - please complete the form overleaf, and email or fax it to us.

Email [calibration@yotari.co.uk](mailto:calibration@yotari.co.uk) - Fax 0345 257 9983 - Phone us on 01482 827600.
